

SAFER COOKED MEAT PRODUCTION GUIDELINES

A 10-POINT PLAN

PREPARATION

- 1 Clean and disinfect the raw meat preparation area before you start. This area must be separate from any area in which cooked meat is handled. A detergent solution should be used to clean surfaces before they are disinfected. It is important to use the correct disinfectant for surfaces and equipment which will not adversely affect the food, and to use it at the appropriate concentration. For guidance on the use of disinfectants see point 10.

Wash your hands before and after handling the raw meat.

COOKING

- 2 To cook meat safely so that *E coli 0157*, *Salmonella* and *Listeria* are killed, the centre of the meat must reach a core temperature of at least 70°C for 2 minutes or an equivalent temperature/time combination, or until the juices run clear.
- 3 Make sure your cooking equipment can achieve this consistently.
- 4 The cooking process must be monitored. You should record the core temperature of at least one item from every cook, using a probe thermometer. Wash and disinfect the probe thermometer after each use. Remember to check the accuracy of the thermometer regularly.

COOLING

- 5 The cooked product should be cooled as quickly as possible in order to prevent the growth of food poisoning bacteria, and then kept under refrigeration. Remember, the smaller the joint, the quicker it cools.

HANDLING AFTER COOKING

- 6 Clean and disinfect the cooked product handling area, which must be separate from any area in which raw products are handled.
7. Always wash your hands before handling cooked products. All equipment must be thoroughly cleaned and disinfected before and after use on cooked foods.
8. Never allow raw foods or any other product, used utensil or tool, or surface likely to cause contamination, to come into contact with cooked foods.

REMEMBER: FOOD POISONING FROM COOKED FOODS OFTEN OCCURS AS A RESULT OF CROSS-CONTAMINATION FROM RAW FOODS.

EQUIVALENT CORE COOKING TIME/TEMPERATURE

9

Temperature	Time
60°C	45 mins
65°C	10 mins
70°C	2 mins
75°C	30 secs
80°C	6 secs

HELP AVAILABLE

- 10 Your Trade Associations or the Environmental Services Department will be able to help you if you need any further advice on the safe handling of foods and on disinfectants.

Help and advice on checking that cooking equipment is working properly may be obtained from the Meat and Livestock Commission telephone number 01908 677577.
