

Pest control & wildlife management

Humane, sustainable and efficient service from Brighton & Hove City Council

Brighton & Hove City Council has been providing expert pest control services for over 50 years. Keeping our streets, businesses and communities safe from pests.

We are committed to protecting the local environment, have detailed local knowledge and experience, and are able to offer a rapid response.

**Brighton & Hove
City Council**

Our officers have a complete understanding of pest ecology and habitats, and focus on environmental controls such as pest proofing, removing water, food sources and harbourage.

Business service

We provide a bespoke, individual prevention and control programme specifically tailor-made to help your company:

- prevent disease transmissions to you, your staff and your customers.
- prevent contamination of foodstuffs, goods and water supplies.
- prevent damage to goods and equipment.

We can also help you prevent prosecution and the risk of fines, and damage to your company's reputation.

We offer:

- a total service for one off treatments for specific problems, or fixed period contracts for long term protection
- contracts tailored to suit customer's needs
- no hidden charges for standard equipment or materials
- on-site reporting and record keeping
- product safety data sheets
- Risk and COSHH assessments
- rodent control and proofing
- insect control and proofing

Residential service

For residents we provide a treatment service for rats, mice, fleas, cockroaches, and wasps. We also provide a service for replacing broken air-vents to stop rodents from gaining access to your property.

Home use kits

We offer a comprehensive selection of cost effective kits for home use. Each kit is supplied with a specific advice sheet explaining how to get the best results from each product. Our officers are on hand to offer tailored advice and information about using the products over the phone.

When do we use poisons?

We only use poisons as a last resort. Where we do use them, we use the least environmentally harmful methods possible, and we always remove poisons within 35 days, to ensure that wildlife and ecosystems are not harmed.

Wildlife advice service

This new service will provide advice for all wildlife issues in or around your home or business.

Our team of highly skilled Pest Control Officers will come to your home/ premises giving site specific advice on pest prevention and proofing using humane non-lethal methods.

We give advice on:

- Seagulls
- Pigeons
- Badgers
- Squirrels
- Bees
- Foxes

Testimonials

Thank you very, very much for all your hard work and for going the extra mile at Birdham Road. Without you it wouldn't have moved as fast as it did and I wouldn't be back there now.

Thank you so, so much!

Brighton resident

I wanted to let you know how valuable the council pest control service is. Due to close proximity to the railway line and our compost heap, we have frequently had rats visiting the garden. As a result we have extensive experience of the pest control service over the last few years. The pest control officers are courteous, efficient and extremely knowledgeable. I think we have probably seen most of the team over the years, and they are all equally excellent. I have heard of the pest control service offered by neighbouring councils and ours is clearly superior.
