

# Plans for The Hove Station Area

## Brighton and Hove City Council

The Council has plans for changes in the Hove Station area.

We think our ideas will make the area a better place in the future.

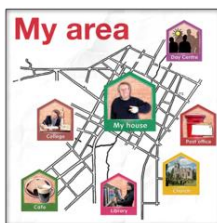

Changes to the area will bring more homes and more jobs.

We would like to tell you about our ideas and hear what you think.

### Where is the Hove station area?

## Why do we want to change the area?

The area is rundown at the moment. Improving the area will bring more homes and jobs.

Here are some of the things we want to improve

- The roads and pavements are not good for people who are walking or in wheelchairs
- It is hard to cross from one side of the railway line to the other

- A lot of places are not accessible for disabled people

- The roads are not very safe for people on bikes

- It is hard to get to other parts of Brighton and Hove

## How would it make the area better?

- Better transport to the rest of Brighton and Hove
- Safer roads and pavements
- Better access for disabled people
- Nicer outdoor spaces where people can spend time
- Better places for businesses and work
- Nicer places for people to live

## Some of our ideas

### Better pathways

- At the moment it is hard to get from one place to another.
- We think it is important that people can walk around the area safely.

- So we want to join up the different places with better pathways.
- This will mean people can enjoy walking around the area.

## Honeycroft Community Hub

- The Honeycroft Community Hub is a great place for people to meet.
- It also has an outdoor space where people can get together.
- At the moment the outdoor space is not very nice and people do not use it much.
- We would like to make improvements so that people enjoy spending time here.

## Hove Railway Station entrance

- We want to improve the space in front of Hove Railway Station.
- This will make it a nicer community space for people to spend time in.
- We want Hove Railway Station to be more accessible to disabled people.

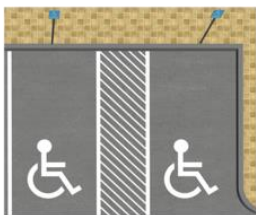

## Crossing the Railway Line

- At the moment it is hard to cross from one side of the railway line to the other.
- We want to make this easier and safer for people.
- We plan to make the footbridge better and put in lifts for better access.
- We also want another footbridge over the railway. This will make it easier to get to the new homes and other buildings.
- The road tunnel is dark and busy with cars.  
We want to make it safer with less traffic.

## Make the area greener

- It is important for the environment that we have green spaces in our cities.
- It is also good for the people who live and work there.
- We plan to have:
  - Lots of green planting in the area
  - A small park
  - Community spaces to grow food and do gardening

## Traffic control

- We want to make the whole area safer and nicer for people who are walking.
- This means that in some places there will be no cars.
- In other places there will be speed limits.
- We will make sure there is disabled parking and access.

Have your say!
