Lewes Road Area Transport Improvements

# Newsletter

## Issue 6 – August 2013

Welcome to the sixth edition of the Lewes Road Transport Project newsletter, keeping you up to date with improvements in Brighton & Hove funded through the Government's Local Sustainable Transport Fund (LSTF).

### Lewes Road construction update

We are delighted to report that the construction works on Lewes Road are now three months ahead of schedule and are expected to be completed by the end of September 2013.

Once the works are complete, the legal enforcement of the bus lanes and parking restrictions will commence. Look out for warning signs along the route in September for further information.

To celebrate the completion of these important works we hope that you will join us for a launch event in early October. We will be sending out further information over the coming weeks.

### Woodingdean to Falmer Path

The construction of a new 2.5 metre wide limestone path between Woodingdean and Falmer is now well underway and is programmed to be completed by the end of September 2013.

To avoid damage to the farmer's crop during construction, works have started in the middle section. However, all sections will be completed creating a continuous off-road path between Woodingdean and Falmer for the future enjoyment of walkers, cyclists and horse riders.

*South Downs National Park – on your doorstep*

## **Improving access to the South Downs**

We are currently reviewing access routes into and through the South Downs National Park. This includes improvements to access gates, path surfaces, signage, maps and information to help you get out in the South Downs and explore the beautiful sites on your doorstep.

If you know of any routes that are in need of improvement or if you know an attractive route that you would like to share with others then please get in touch.

*New cycle stands in Lynton Street*

## **Personalised Travel Planning**

Our Personalised Travel Planning (PTP) team have been out and about supporting local communities and taking action to get local improvements in place. Recent requests from residents that have been implemented by our PTP team include:

- Replacing a broken bench with two new cycle stands in Lynton Street (see picture).
- Help with creating a “Playing Out” scheme in Hartington Road by providing signs, high-visibility tabards and printed flyers.

If you would like help with local initiatives that would encourage you to walk, cycle or use the bus and train a bit more, please contact our PTP team using the email address overleaf.

## **Real-time bus information signs**

As part of the LSTF project we plan to install 19 new real-time information signs at bus stops in the areas of Moulsecoomb, Bevendean, Coldean and Hollingdean. Based on requests we have received from local residents and information from the Brighton and Hove Bus Company, we are now finalising the list of locations that are planned to be installed in the new year.

## **Vogue Gyratory improvements**

Feedback received as part of the consultation in 2012 is being used to help shape the improvement plans for the Vogue Gyratory. It is anticipated that improvements to this junction will start in the new year. The plans will be made available for the public to view before the work starts.
