

A young girl with dark hair in pigtails, wearing a white school uniform, stands in the foreground holding a metal instrument. In the background, other children and a teacher are engaged in a music activity with various instruments on a table. The classroom walls are decorated with colorful paper birds and a Santa Claus poster.

Ofsted reports rank the city's primary and secondary schools as 94% good or outstanding.

Living in the city

## Education

The city has a good standard of state schools including 52 primary and 10 secondary schools. Post 16 yrs there are three Further Education Colleges and 5 Sixth Forms.

Brighton & Hove schools range from traditional establishments including Brighton Bi-Lingual School to boarding schools such as Brighton College and Roedean, and less traditional schools such as a Montessori and a Steiner School. Internationally renowned language schools such as Bellerbys International School and St Giles International, attract a broad range of students furthering the city's global reach.

The city's private education sector includes several award-winning independent schools catering for national and international students.

Brighton College is in the top 1% of schools in England.

Roedean College achieved the best girl's school A' Level results in Sussex 2017.

The city has two top universities; Sussex University, ranked in the UK top 25 with a good international reputation and Brighton University which is leading the way in advanced engineering.

## Healthcare

Brighton & Hove benefits from 43 NHS doctor surgeries; 45 NHS dentist practices and over 50 private practices.

The Royal Sussex County Hospital is a centre for emergency and tertiary care. The Brighton campus includes the Royal Alexandra Children's Hospital, the Sussex Eye Hospital and is the Major Trauma Centre for the region. A specialist Breast Care Centre and two private hospitals are also located in the city.

**The Royal Sussex County Hospital is undergoing major redevelopment worth £485 million. It will include a new and expanded cancer centre and improvements to stroke services and intensive care.**
